Stark Bro's

FALL BUYERS

Condensed Catalog and Price List

**STARKING APPLES on Young 2d Generation
Trees. Compare These With Still-Green Delicious**

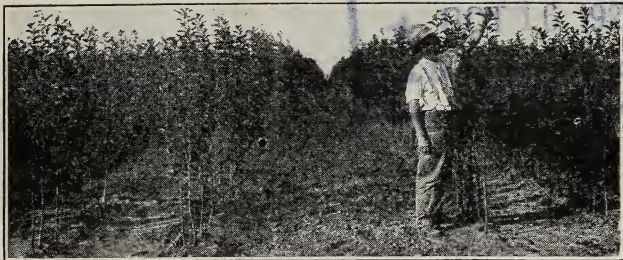

Two hundred people in these offices of STARK BRO'S NURSERIES AND ORCHARDS COMPANY—comprising the Executive Department, Sales Department, Landscape Department and Research Department. Two other large Office Buildings not shown in this photograph.

Five hundred men in packing houses. Many men here have been members of this organization from twenty-five to forty years.

A solid train load of Stark Trees—thirty-two cars moving out of the nurseries. In addition to immense freight shipments, several carloads of Express move daily.

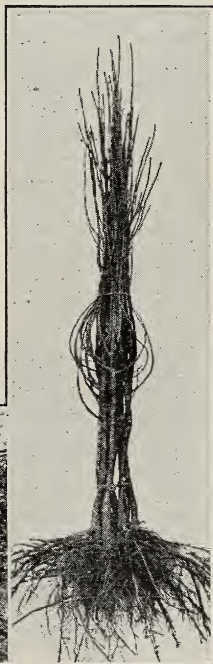

"OLD OAK PROCESS Whole Root Trees" is a Trade-Mark, registered in the U. S. PATENT OFFICE and owned by Stark Bro's. It denotes the Superior Whole Root Trees produced by our Over-a-100-Year Old Nurseries.

Years ago the Stark Nursery came to the parting of the ways. They could have easily followed the beaten road used by other Nurseries, but they were not satisfied with the then accepted Nursery methods. A new school, headed by men like Charles Downing, was Sounding a Warning against Piece Root trees, and the Stark's Experience bore out their claims. Then it was Stark Bro's took the unbroken road and blazed a new Nursery trail. From this beginning grew the present Stark growing method, later known as the "Stark Old Oak Process" method of growing Whole Root Trees.

The roots are the feeders of a tree. If they are strong and healthy (like the **BIG** roots on the right, in photo) they will reach out and produce big, husky, fast-growing young-bearing fruit trees.

The tree that has big, strong, vigorous roots quickly extends its root system downward and in all directions and shoots upwards like a husky, healthy outdoors boy.

Every tree we offer is a Whole Root Tree. We have no room here for worthless Piece Roots.

A Block of Marvelous 2-Year Whole Root Apple Trees and a bundle dug and ready to ship.

Starking (at right) and Stark Delicious (at left) picked the same day. Note Deep Red color of Starking.

STARKING
KING OF
ALL RED APPLES
TRADE-MARK

Our new \$6,000.00 Blood Red Stark Delicious Bud Sport occurring as a Limb on a Genuine Stark Delicious—Twice as Red—Colors Earlier—Keeps Later.

"A PHENOMENON OF NATURE"—declared one of the nationally known pomologists who, with a group of his fellow scientists, had come hundreds of miles to see this tree.

\$6,000.00 for One Limb. Lewis Mood, a New Jersey orchardist, planted some Stark Delicious trees about 1907. When these trees came into bearing, a limb on one of these trees attracted the owner's attention because the apples on this limb took on a deep brilliant red color at least three weeks before the apples on the other limbs, or on any of the other surrounding Stark Delicious trees began to color. He top-worked a number of young trees, in order to satisfy himself that this early coloring habit would be transmitted to its offspring.

In the meantime, a well-known horticulturist, who knew of our unceasing search for improved fruits, told us about this New Jersey tree. We investigated, bought the tree, erected a strong cage around it and began a series of tests to prove beyond a question of doubt that scions from that limb **would** produce trees that **would** yield apples having this desirable habit of early and deep red coloring.

Starking (Trade-Mark) is the great commercial apple of the future. The greatest money-making red apple since the Stark Nurseries gave Stark Delicious to the fruit world 28 years ago. It is offered this season for the first time, and we urge those who want to plant Starking trees to get their orders placed early. Don't delay; our supply of Starking trees is, of course, not very large. The Starking Agreement, under the terms of which the tree is sold, is at the bottom of the enclosed Order Blank. Don't fail to sign this Agreement.

Plant Starking (Trade-Mark) in every home and market orchard. Fill up every vacant space with Starking.

THE CRITICAL JURY THAT TRIED STARKING

Included in this Investigation Delegation (or Jury) were **PROF. SHAW, MASSACHUSETTS**, Research Professor in Pomology; **PROF. DORSEY, WEST VIRGINIA**, State Horticulturist; **PROF. GOURLEY, OHIO**, Chief Horticultural Department; **PROF. OSKAMP, NEW YORK**, Extension Professor in Pomology; **PROF. MATTHEWS, NORTH CAROLINA**, State Horticulturist; **PROF. POTTER, NEW HAMPSHIRE**, State Horticulturist; **PROF. RALSTON, VIRGINIA**, State Horticulturist; **PROF. SWEETSER, MAINE**, State Horticulturist; **PROF. LEWIS, CHICAGO**, Editor American Fruit Grower; **PROF. PADDOCK, OHIO**, State Horticulturist; **PROF. HOLLISTER, CONNECTICUT**, State Horticulturist; **PROF. FARLEY, NEW JERSEY**, State Horticulturist, and many more fruit authorities. These men, with thousands of other visitors, viewed and inspected the original **STARKING** tree and the young second generation **STARKING** trees propagated from the bud-sport limb.

Starking Prices

300 at 1000 rate; 30 of a kind at 100 rate; 10 or more of one variety at 10 rate; less than 10 at Each rate.

1st Class (Late Winter)	Each	10	100	1000
4 to 7 ft.....	\$2.00	\$17.00	\$140.00	\$1,100
3 to 5 ft.....	1.75	16.00	130.00	1,000
2 to 3 ft.....	1.50	14.00	110.00	900

Second Generation Starking Tree in Fruit. Deep Red Before Other Winter Apples Begin to Color.

From 130 trees in this orchard the American Fruit Growers, Inc., the largest orchardists in the world, harvested 1,220 packed boxes of Golden Delicious which sold for \$5,583.00—averaging \$42.95 per tree.

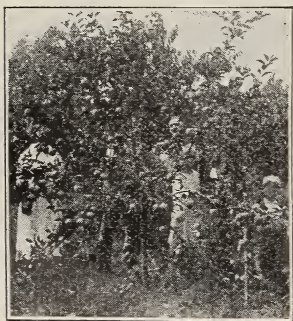

GOLDEN DELICIOUS
QUEEN OF
 ALL GOLDEN APPLES
Trade Mark Reg.

This is indeed a remarkable yellow apple. Unusually Large, Waxed, Golden Yellow—with a rich, alluring beauty that tempts the buyer and commands remarkably high prices. A great commercial and “family” apple—once tasted, always wanted.

Averages about 50 per cent larger than Grimes Golden grown under ordinary conditions—and even superior in flavor to Grimes and far superior in keeping qualities. It is a round, glossy, Golden Yellow apple, slightly conical—somewhat like Stark Delicious (red). Flesh is Rich, Creamy Yellow, a faint tint of orange—Crisp, Firm, with a Sparkling Tang-ful Flavor much resembling that of a great glorious pear. It is a marvelously late keeper and goes on the market in late spring in perfect condition.

TWO-YEAR GOLDEN DELICIOUS BEAR CROPS IN 33 DIFFERENT STATES

What do you think of that? In scores of orchards North, East, South and West—In Illinois, Missouri, Virginia, California, District of Columbia, Louisiana, Wisconsin, New Jersey, New

*4 Year Old Golden Delicious
 Bearing Third Crop.*

Hampshire, Oregon, Pennsylvania, Tennessee, Texas, Iowa, Maryland, Connecticut, Massachusetts, Michigan, New Mexico, Washington, West Virginia, Indiana, Kansas, Ohio, Kentucky, New York, and several other states. That's the record of two-year-old Stark's Golden Delicious.

Stark's Golden Delicious has the endorsement of orchardists, scientific horticulturists, and Experiment Station men everywhere. In Golden Delicious seems to be combined all the good qualities required in the perfect apple.

HEAVIEST CROPPER—YOUNGEST BEARER

Stark's Golden Delicious is the Wonder Tree of the Orchard; heaviest bearer ever produced—tremendous crops of big apples. Branches bend, but do not break. These super-crops of big apples are borne every year, as it is extremely vigorous, has strength to set bloom buds in spite of its enormous annual crops. The three-time blooming habit (first on fruit spurs, then on terminals and lateral buds—all three sets bloom late, but follow each other), insures that blossoms escape late freezes. "Golden Delicious bloomed for one month," says D. L. Swarts, Lancaster, Ohio. It has broken all records of frost resistance and sure annual crops. It bears big annual crops on poor, steep, uncultivated hillsides. "Golden Delicious hardy as Wealthy," says Wisconsin Grower. Healthy, disease-resistant, successful in all soils—a perfect orchard tree. From Maine to California, from Canada to the Gulf, orchardists have seen Golden Delicious succeeding everywhere and are planting them in large quantities in great commercial orchards.

STARK'S GOLDEN DELICIOUS AWARDED WILDER MEDAL

What the Supreme Court is to United States law, the American Pomological Society is to American fruit and horticulture—the **Final, Highest Authority.**

This great body of scientists and horticulturists has awarded to Stark's Golden Delicious the **only Wilder Silver Medal** with one exception ever awarded to an apple in the last 35 years. This medal was "struck off" on the massive presses of the United States Mint, by special order, and is now in our possession.

Golden Delicious Prices

300 at 1000 rate; 30 of a kind at 100 rate; 10 or more at 10 rate; less than 10 at Each rate.

STARK DELICIOUS

THE RED APPLE KING THAT HAS REVOLUTIONIZED AMERICAN APPLE GROWING

The public no longer wants just "Apples." It has been educated up to the Stark Delicious Standard—the highest red apple quality ever produced, and the tree planter in selecting varieties for a new orchard should keep this thought in mind. Stark Delicious, Golden Delicious and Starking are the three great commercial money-makers and should be planted almost to the exclusion of all others.

Has Won Highest Favor and Brought Highest Prices Everywhere.—Stark Delicious is a great big waxen red apple with crisp, tender flesh of exquisite juiciness and flavor. Its aromatic flavor is so refreshing, its flesh so meltingly tender and juicy, that after eating one and learning of its marvelous quality, no other red apple will ever completely satisfy you.

Its strong skin, sound flesh, immunity from bruise and rot, and ability to hold its alluring flavor and aroma during months of storage have earned for Stark Delicious the highest reputation as a long keeper and a top-market-price apple that will safely undergo long distance shipment—and on every market year after year it outsells all others.

The Stark Delicious Tree in the orchard is just about as nearly perfect as a tree can be. The marvelous size, coloring and quality of the Stark Delicious apple are more than equaled by the vigorous growing qualities, the young bearing and steady bearing habits, the great sturdiness and, above all, by the astonishing hardiness of the superb Stark Delicious Tree. It seems to be able to endure all climates, all kinds of weather conditions and still bear a wonderful abundance of glorious big apples.

2 to 3 ft.....	.65	6.00	55.00	350

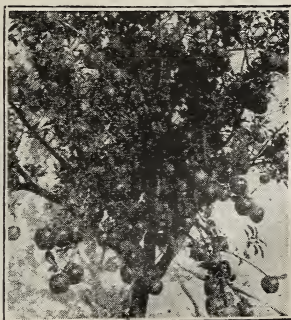

STARK BRO'S ORIGINAL TREE STRAIN OF STARK DELICIOUS

Your orchard is a lifetime proposition. You don't want to gamble—you must be sure. You want the genuine Original Tree Strain of Stark Delicious—the one that is backed by a record of 50 years of proven hardiness, disease resistance, and regular annual bearing.

We alone control propagation from the original tree. We bought perpetual, exclusive and sole propagating rights and control of the Original Stark Delicious tree, and no other nursery or person can propagate from it. Our propagating orchards are continually renewed from this tree.

"Just as a spring is purest at its source," so the Original Tree Strain Stark Delicious is your best assurance of orchard success.

To try to enumerate the scientific horticulturists who have given their enthusiastic endorsement to this King of Apples would be like preparing a roster of all the scientists and orchardists in the country, for Stark Delicious is the leading variety in practically every section of the United States where apples grow—and is without question the best known, best liked and most universally endorsed American apple.

6-Yr. Missouri Stark Delicious Bearing 3rd Crop.

SUMMER APPLES

EARLY RED BIRD (Crimson Beauty, erroneously). To the home owner who wants both a red and a yellow apple that get ripe extremely early we recommend Early Red Bird and Henry Clay. Early Red Bird is the earliest apple we know; the size is satisfactory, the color a flaming scarlet, and the tree bears young, every year, and is thoroughly hardy. 10c Extra.

HENRY CLAY (Trade Mark). A large yellow apple that looks and tastes like Maiden Blush, but is ripe ahead of Yellow Transparent. After a century of testing varieties the Stark Nursery recommends Henry Clay as immeasurably superior to any other early yellow Summer apple. Like Early Red Bird, the tree is hardy, a thrifty grower, bears young, regularly and abundantly.

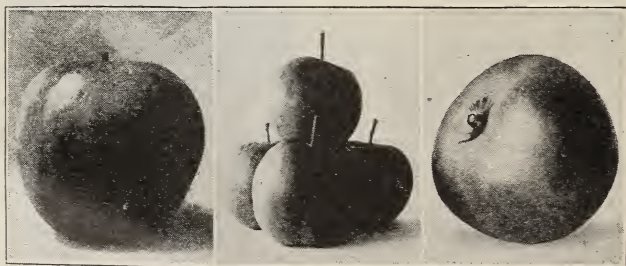

YELLOW TRANSPARENT. Ripe just after Early Red Bird and Henry Clay, and is one of the most widely planted summer apples. Despite the fact that the fruit runs rather small and that the tree sometimes blights seriously, it has paid well.

SUMMER CHAMPION. We introduced this apple many years ago from the Ozarks and it is a winner everywhere. It is a big, brilliant, red striped, luscious eating apple that is one of the most attractive of all summer varieties. Ready for the market ahead of Maiden Blush and is the best keeping and shipping apple of its season.

WILSON RED JUNE. A big, red apple that gets almost as large as Black Ben, just as brilliantly colored, and ripens considerably later than Early Red Bird and Henry Clay. Wilson Red June, because of size and color, has brought highest prices of any summer apple; on Kansas City markets has brought as high as \$16.00 per barrel.

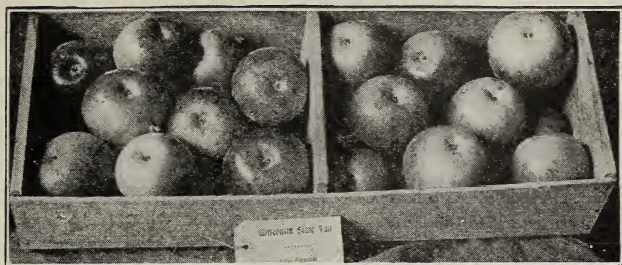

OTHER SUMMER VARIETIES WE CAN SUPPLY

In addition to above described summer apples we offer several other varieties. Lack of space prevents the writing of descriptions, but the following are all good, and are favorites with many growers: Early Harvest, Liveland Raspberry, Stark Summer Queen, 10c extra; Jefferis Red, Sweet Bough, Maiden Blush, Duchess and Carolina Red June.

Summer Champion. Early Red Bird.

Henry Clay.

Wealthy—the Greatest Fall Apple.

FALL APPLES

WEALTHY. Orchardists haven't much choice when they want to plant a fall apple to ripen between Summer Champion and Jonathan. There are probably a half dozen kinds that are worthy of consideration, but at this time we will describe only one, as Wealthy is unquestionably the best. It is extensively grown all over America and there is an established market for it. The fruit is medium to large in size, brilliantly red striped, the quality is superb—refreshingly juicy, a wine-like flavor, and one of the best apples for cooking. The tree is rather spreading in growth, bears young, is extremely hardy, and one of the most dependable bearers. Plant Wealthy in every home orchard and for the market.

OTHER FALL VARIETIES. We also offer Buckingham Improved, Banks Red Gravenstein, Lowell, Imperial Rambo (10c Extra), Mother and Early Melon—all good, but Wealthy is the fall apple that is recommended by practically all the orchardists and scientific horticulturists in the country.

Low Price Demonstration Offer on Starking, Stark Delicious, Stark's Golden Delicious

In order to assure the planting of a good sized orchard in every community in the United States, we are making some very low prices to those who will plant demonstration quantities. Customers are to be first class, reliable and agree to take good care of the trees.

For full particulars and terms turn to page 44 of this book. Every fruit grower should take advantage of this special offer.

Prices for All Varieties on Pages 10 and 11 except as noted.

300 at 1000 rate; 30 of a kind at 100 rate; 10 or more of one variety at 10 rate; less than 10 at Each rate.

1st Class	Each	10	100	1000
4 to 7 ft.....	\$1.10	\$10.00	\$85.00	\$550
3 to 5 ft.....	.80	7.50	65.00	400
2 to 3 ft.....	.60	5.50	50.00	300

WINTER APPLES

Double Life Grimes Golden Trees—grown by Stark Double Life method

growers are getting good crops every year from their Jonathan. This apple is so well known that an extended description is unnecessary. We advise its planting in every commercial and home orchard.

DOUBLE LIFE GRIMES GOLDEN.

Until Golden Delicious became known to the apple-eating public, Grimes Golden was recognized as the Standard American high quality Yellow Apple. It makes an ideal permanent orchard tree; bears regularly and heavily. The Old Grimes Golden had a fatal weakness—collar rot, which generally attacked the tree when about 15 to 18 years old; causing the death of the tree in a short time. The Stark Double-Life Method of double working Grimes Golden eliminates this trouble, and we offer trees that are as long-lived as any other variety. We recommend the planting of Grimes Golden, Starking, Jonathan, Stark Delicious and Stark's Golden Delicious. 10c Extra.

JONATHAN.

With the exception of Stark Delicious probably more apple lovers know and like Jonathan than any other apple—and they ask for them when they go to the fruit stand or grocery store to buy apples. As a result it is one of the best sellers and one of the best paying varieties to grow. Jonathan is widely adapted and largely grown throughout the Northwest, Central West, East and South—everywhere, except far North. Tree is spreading, long-lived, resists canker, bears alternately heavy and light crops—but by proper fertilizing

Double Life Grimes Golden—Great Money Makers

Branch of Stayman Winesap.

STAYMAN WINESAP. The Winesap group of apples is a great factor in the American orchard, and Stayman Winesap is unquestionably the best of this group. Some growers go even farther than this and declare it to be the best winter keeping apple, but in our judgment Starking, Stark Delicious and Golden Delicious are much superior—then we name Stayman Winesap. However, like other apples of the Winesap group, Stayman should not be planted in solid blocks, as it requires some other variety planted near it to insure proper pollination. For this purpose Stark Delicious and Golden Delicious are recommended, as both are wonderful pollen producers. Stayman is of large size, well colored, of splendid commercial shape, keeps well—and is of superb quality—luscious, rich, juicy.

The tree is just about as perfect as a tree can be. Grows to immense size, spreading strong, tough branches that hold up the immense crops it bears without splitting or breaking. Bears young, heavily and the fruit is uniformly large—only a small per cent goes to culls.

In traveling through the orchard sections of the entire country, we have found that, except in the extreme North, the popularity of Stayman is surprising. The reasons may be summed up in the unbiased statements of a few of the best known orchard men in the country.

Frank Moffett, Hamilton Co., Ind.: "The nearest approach toward the ideal all-purpose apple."

Prof. C. P. Close, Pomologist, U. S. Department of Agriculture: "For quality stands next to Delicious."

L. Fairchild, Fairfield Co., Conn.: "Six-year-old trees bore a barrel each."

Prices for varieties on Pages 12 and 13—Except Double-Life Grimes, which is 10c Extra.

300 at 1000 rate; 30 of a kind at 100 rate; 10 or more of one variety at 10 rate; less than 10 at Each rate.

1st Class	Each	10	100	1000
4 to 7 ft.....	\$1.10	\$10.00	\$85.00	\$550
3 to 5 ft.....	.80	7.50	65.00	400
2 to 3 ft.....	.60	5.50	50.00	300

Glorious Stark King David.

STARK KING DAVID. The man who contemplates using winter apples as fillers in an orchard cannot do better than select Stark King David and Golden Delicious—both extremely young bearers of high quality fruit that will bring top-market prices. Of course, both varieties are also ideal permanent trees, but we suggest them as fillers, because we have so many inquiries concerning winter apple trees for this purpose. King David averages slightly larger than Jonathan, is deeper, darker red, and is richer and juicier.

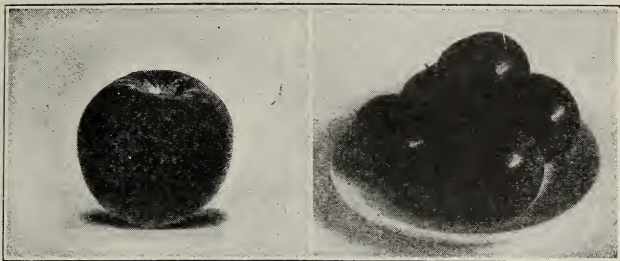

DARK RED ROME BEAUTY. The Old Rome Beauty has long been a popular winter apple, but growers complained about the color—it was not red enough to be attractive on the market. About 15 years ago, after extended investigation, we began the propagation of a Red Strain of Rome Beauty from a tree in the orchard of U. T. Cox of Ohio, which bore Rome Beauty that were blood red from the stem to the calyx. These trees in our own orchards have borne in the third generation and the fruit has maintained its marvelous red color. 10c Extra.

PARAGON. Some poetically inclined orchardist once called Paragon "The Glorified Winesap" and we have never been able to find a title that was more fitting. It is a seedling of Winesap, but averages at least 50 per cent larger, is deep red in color, of better quality and one of the best winter keepers. Our strain is from a proved tree fully typical of the variety, selected as a perfect type Paragon.

McINTOSH. A tender, juicy, fragrant, high quality apple that is largely grown throughout the North, New York and New England. Tree long lived, extremely hardy, strong, spreading grower, bears young. We grow from a select strain. 10c Extra.

CORTLAND. Produced on the grounds of the New York Experiment Station and recommended by the scientists of that station as superior to McIntosh. Our propagation is from scions from the original tree—and is the purest strain obtainable. 25c Extra.

BLACK BEN (Trade Mark). Has made money for growers from the Atlantic to the Pacific, and we know of no tree that will produce more bushels. Large, deep, solid red, holds perfectly in storage and always commands good prices.

Paragon.

Dark Red Rome Beauty.

OTHER WINTER APPLES OFFERED

In addition to the varieties described in this booklet we grow and offer many other kinds of winter apples, but because of limited space we cannot carry descriptions. Below is a list of other well-known apples we can supply:

Baldwin	Giant Jeniton
Bellflower Improved	Northern Spy
Banana	N. W. Greening
Champion	Paradise Winter Sweet
Fameuse	R. I. Greening
Golden Winesap	Senator
Jeniton	Winesap
M. B. Twig, Imp'd	White Pippin (10c Extra)
York Imperial	Willow Twig

Prices for all Apples on Pages 14 and 15 except as noted.

300 at 1000 rate; 30 of a kind at 100 rate; 10 or more of one variety at 10 rate; less than 10 at Each rate.

1st Class	Each	10	100	1000
4 to 7 ft.....	\$1.10	\$10.00	\$85.00	\$550
3 to 5 ft.....	.80	7.50	65.00	400
2 to 3 ft.....	.60	5.50	50.00	300

CRAB APPLES

STARK FLORENCE CRAB. "Worth All Others Put Together."

—Most valuable crab we have tested—and we have fruited them all. Bright, ruby red, striped crimson. Tree dwarf, spreading, young bearing, extremely hardy, blight resistant; in blossom a marvelous sight—ideal ornament for lawn. Delicious for sauce, wonderful for jelly, jam, preserves, cider; the housewife's favorite. Plant close—12 feet; splendid filler.

STARK GOLD CRAB. To those planters who prefer a yellow crab, we offer the Stark Gold. It is a beautiful golden color, perfect for jelly; tree hardy as an oak, bears big crops.

Prices for Crab Apples

1st Class	Each	10	100	1000
4 to 7 ft.....	\$1.50	\$13.00	\$120.00	\$800
3 to 5 ft.....	1.25	11.00	100.00	700
2 to 3 ft.....	1.00	9.00	80.00	600

A Million Stark Peach Trees in a Single Field.

EARLY PEACHES

RED BIRD CLING. Earliness, size, glorious colored fruit and hardy, young, heavy bearing trees combine to make Red Bird Cling by far the most popular and profitable early season peach. The flesh is firm like Heath Cling, making it an ideal shipper, and it rots very little. The first peach of consequence to go on the market. A big and sure money maker.

JUNE ELBERTA. The earliest ripening good yellow peach; fine flavor, flesh a deep yellow clear to the seed—by far the best very early yellow peach. A big, fine looking peach that ripens just after Red Bird Cling.

ALTON. Of all white peaches, no other is so dependable.

Earlier and much better than Carman, while its rosy red cheek with a background of creamy white makes it one of the handsomest of all peaches. The flesh is white, firm, juicy, melting and the flavor is rich and luscious. Comes on the market when good peaches are scarce and always commands top prices. Because of hardiness will stand far North, while in Southern regions it is a great favorite.

In addition to the Early Peaches described we can supply the following:

Mayflower
Greensboro
Early Rose

Early Mamie Ross
Hiley
Champion

Crawford Early Imp'd
Worth
Carman

Alton.

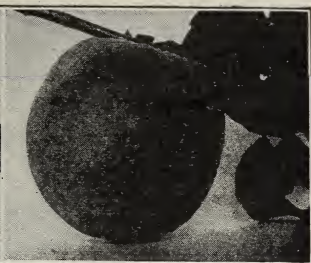

JAPAN GOLDEN GIANT

CLING. A marvelous peach recommended by Japanese Experiment Station and imported by us. In our orchards the fruit is very large, golden yellow with rich blush; flesh pure golden yellow. Ripe nine days before Elberta (5c Extra).

EUREKA. The great ironclad white peach ripening after June Elberta. Fair crop after 32° below zero. Creamy white, bright red cheek, delicious quality.

June Elberta.

Red Bird Cling.

MID-SEASON PEACHES

ELBERTA (Queen). The finest strain of the best known American peach. This strain which we have kept separate and pure for a number of years averages larger, rounder, and orchardists have told us that side by side with other Elbertas, commanded better prices. The markets, however, are paying better prices for Stark Early Elberta and J. H. Hale.

ELBERTA CLING. An immense yellow peach that looks like Elberta, but is a perfect clingstone and of superb quality with firm, solid flesh that makes it an excellent shipper. We recommend it as the best all-around cling we have ever seen. Ripes just ahead of Elberta.

GOLDEN SWEET CLING. One of the juiciest, sweetest, most delicious clingstones. Tree is hardy, bears heavily, fruit unusual size—one of the handsomest in the orchard. Ripe seven or eight days after Elberta Cling (5c Extra).

ILLINOIS (Trade Mark). A large, handsome, creamy white, red-cheeked peach of highest flavor that keeps well and ships well. Originated with E. H. Riehl, Illinois Experiment Station, and introduced by us. A wonderful white peach. Ripe seven days after Elberta

OTHER MID-SEASON VARIETIES

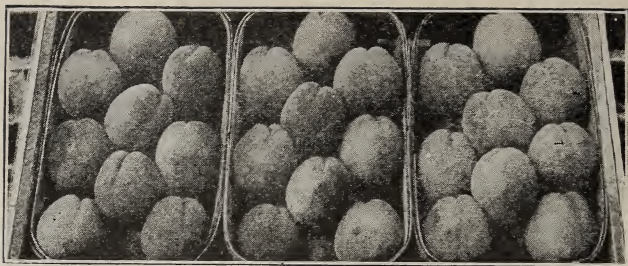

Oldmixon Free Imp. (5c Extra)	Shippers Late (10c Extra)
Belle of Georgia	Crawford Late Imp'd
Capt. Ede	Chairs Choice
Stark Summer Heath	Big Indian Cling (5c Extra)
Washington	Wilma
Salway Imp'd (Holsinger) (5c Extra)	

See Pages 18 and 19 for the two best Mid-Season Peaches.

Prices on varieties, Pages 16 and 17, except as noted.

300 at 1000 rate; 30 of a kind at 100 rate; 10 or more of one variety at 10 rate; less than 10 at Each rate.

1st Class	Each	10	100	1000
3 to 5 ft.....	\$0.60	\$5.50	\$45.00	\$300
4 to 7 ft.....	.75	7.00	60.00	400
6 to 8 ft., heavy—25c more than 4 to 7 ft. price.				

STARK EARLY ELBERTA (King of the Freestones). Most delicious yellow peach; of huge size, a glorious pure golden yellow, sometimes tinted a beautiful red.

Stark Early Elberta averages larger than old Elberta, has a strong protecting skin covering a luscious flesh that is flavored with a juice as sweet as nectar—better in quality than Elberta or any other yellow peach. No bitterness next to pit.

Stark Early Elberta was introduced by us nearly 20 years ago, and it is today the best liked and most profitable peach of its type. Growers from New York to California, from Michigan to Georgia, have put upon it the stamp of their approval—because it pays.

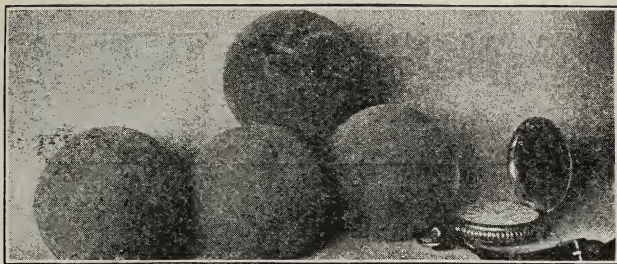

RIPE AHEAD OF ELBERTA

A Basket of Immense Stark Early Elberta.

This great peach is ripe about 10 days ahead of Elberta, and enables the growers to put big, handsome peaches on the market before Elbertas are ready, insuring best prices.

E. W. Kirkpatrick, nationally known Texas peach authority, says: "THE MOST BEAUTIFUL AND PERFECT PEACH I HAVE EVER SEEN; texture finer than ELBERTA, COLOR RICHER AND MORE BEAUTIFUL; A GREAT ACQUISITION TO THE WEALTH OF THE WORLD." Luther Burbank, recognized as the greatest horticultural genius the world has ever known, tested Stark Early Elberta, then wrote us; "One of the handsomest, most shapely and most beautifully colored of peaches; quality fully carries out its appearance. A MODEL PEACH. Congratulations." The whole peach world recognizes its value and its introduction has tremendously stimulated American peach growing.

*J. H. Hale Are Almost Round and of Immense Size—
Glorious Color.*

J. H. HALE. The "Million Dollar Peach." This sensational peach originated with, and was named for Mr. J. H. Hale of Georgia, known all over America as "The Peach King."

In size, color, texture, flavor, keeping and shipping qualities J. H. Hale surpasses Elberta, and outsells it, often bringing \$5.00 per bushel when Elberta sells for \$3.50.

J. H. Hale is of mammoth size, a vivid carmine over Golden Yellow, almost perfectly round, fuzzless and as smooth as a glove. The flesh is solid like a clingstone, yet melting, tender, free from stringiness, of exquisite flavor, without any of the bitter tang of Elberta. The tree is a stocky grower, bears young, heavily, and is successful throughout all sections where Elberta thrives.

We do not advise planting J. H. Hale in solid blocks, as careful experiments have shown that the blossom is to a certain extent self-sterile; therefore, some other variety should be planted with it to insure best results. Practically any variety will be satisfactory for this purpose.

\$5.00 A BUSHEL IN FAMOUS SIMPSON ORCHARD

Among the best known orchards in America are the Simpson orchards at Vincennes, Ind. For several years J. H. Hale has been their big profit maker. Last summer, when most peaches were killed, J. H. Hale produced a big crop that **BROUGHT \$5.00 PER BUSHEL.** The Simpsons consider it their greatest money-maker.

HANDSOMEST OF ALL PEACHES

J. H. Hale is the handsomest thing in the peach line that I have ever seen. Prof. Chenoweth and I agree that it is a much handsomer peach than the Elberta, better in quality and a much better market peach.—F. C. Sears, Prof. Pomology, Mass. Agri. College.

Prices of Stark Early Elberta and J. H. Hale.

300 at 1000 rate; 30 of a kind at 100 rate; 10 or more at 10 rate; less than 10 at Each rate.

1st Class	Each	10	100	1000
3 to 5 ft.....	\$0.70	\$6.50	\$55.00	\$400
4 to 7 ft.....	.85	8.00	70.00	500
6 to 8 ft., heavy—25c more than 4 to 7 ft. price.				

Late Elberta.

Krummel October.

LATE ELBERTA. The best variety ripening between J. H. Hale and Krummel October. Ripens about two weeks after Elberta and comes on the market after Elbertas are gone and people are peach hungry. A big, yellow freestone peach that resembles Elberta, but is of better quality. The tree is satisfactory in every way. Plant the Genuine Stark Late Elberta, and you will not be disappointed. 10c Extra.

STARK HEATH CLING. Best strain of the well-known White Heath. Fruit tender, melting, juicy, luscious, and firm. Tree hardy, good grower, and a good bearer.

KRUMMEL OCTOBER. Unquestionably the best of all late peaches. Of splendid size, almost round, deep yellow in color with bright red cheek; luscious, sweet, no bitterness at the pit; flesh firm, finest canning quality; ships well. Krummel ripens about 45 days after Elberta, and there is always a good demand for the fruit, as it is generally about the only peach offered at that time.

OCTOBER ELBERTA. An Elberta in size, color and quality that ripens 40 days later. It comes in just ahead of Krummel October and sells remarkably well. 10c Extra.

Stark Patented Graft Wrapping Machine.

Stark Trees are the result of a scientifically planned system of nursery procedure—added to, strengthened and brought up to date year after year during **More than a Century** of work and research. Such a system, coupled with best soils, proper climates and necessary capital, makes possible the present excellence of Stark Trees. Original Stark machinery and equipment is a great factor in the production of Stark Old Oak Process Whole Root trees.

There are many reasons why Stark Equipment as well as Stark Knowledge of tree growing and tree handling produces a superior tree. The big **Gang Cultivator** (a Stark idea) is one; the **sprayer** (our own design) is another; the **Graft Trencher**, which pulverizes the soil and makes the trench ready for the reception of the graft, is a Stark invention. To keep the foliage (the “lungs” of the tree) 100 per cent perfect, we invented a special “**Stark Insect Annihilator**”—and when this machine glides over the tops of the trees, agitating them, every living thing that eats, jumps or flies is caught and destroyed. Stark Trees are not dug by a spade nor twisted or pulled out of the ground—they are dug by big super-power tractor-diggers. These carry a digging blade deep under the trees, lifting them without bruising—they come out without a blemish.

The grafts from which Stark Trees are grown are wrapped by a **special Stark invented machine**, insuring a perfect union of scion and root. This grows a stronger and a better tree.

Stark Trees are not exposed to sun or wind when dug. Big covered **Sunproof-Windproof Trucks** follow the diggers and the trees are loaded as soon as dug and transported immediately to our cool **Packing Houses**, where they are graded under cover.

Whether it be in the personal Selection of Buds, the making of Grafts, the Pruning, Spraying and Cultivating the trees in the nursery row, the Digging of stock, Protecting, Packing, Boxing, Shipping, etc., Stark Machinery plays a big and ever-increasingly important part. It is one of the many tangible, visible reasons for the superiority of Stark **OLD OAK PROCESS** Whole Root Trees.

Lincoln.

Fame.

GLORIOUS PEARS

LINCOLN. Best all-round pear tested in our over 100 years of fruit growing. The pear we find worthy of our highest commendation is the GENUINE TRUE Lincoln—of Illinois. Fruit large, clear, beautiful yellow, sometimes blushed—MARVELOUSLY BEAUTIFUL—ideal shipper; QUALITY SUPERB. Tree remarkably BLIGHT RESISTANT, heavy cropper, long-lived. Ripe in late summer, and should be in every orchard.

FAME. There is no more DELICIOUS PEAR than this; juicy, MELTING, SWEET and rich. Seeds few, ALMOST NO CORE; large, blushed yellow, late summer. Hardy, strong, long-lived orchard tree; a young bearer. BLIGHT RESISTANT. INTRODUCED BY STARK BROTHERS (25c Extra).

STARK SECKEL (Sugar Pear). A select strain of this wonderful pear that we have grown for years. Medium size, beautiful yellow; SPICY, HONEYED FLAVOR—the acme of PEAR PERFECTION.

ANJOU. Large, handsome yellow pear, blushed dull red and of richest flavor. Tree upright, good bearer, strong grower, hardy, blooms late, blight resistant. A fall pear.

OTHER VARIETIES. In addition to the four varieties of Standard Pear described above we also offer the following varieties at the same prices: Bartlett, Duchess, Honey Dew, Kieffer, King Karl, Triumph, Tyson, Beurre Bosc and Garber. If Dwarf Pears are wanted, we offer the following: Anjou Bartlett, Duchess and King Karl at the same prices as Standard Pear.

Gold.

THE BEST PLUMS

GOLD (Trade Mark). \$3,000.00 Plum. Our wonderful Gold

Plum has created a greater sensation and made more friends among Plum growers than any other variety ever introduced. Luther Burbank, who originated Gold Plum, says: "Among plums there is nothing on earth so beautiful and good." Fruit ripens in mid-season, is clear, semi-transparent, light golden yellow, later nearly overspread with a hazy carmine blush. Rather dwarfish growing, but strong, healthy and one of the hardiest. We paid Burbank \$3,000.00 for this wonderful fruit and trade-marked the name. Buy the genuine Stark Gold from Stark Bro's—the exclusive introducers and owners. Succeeds everywhere—from the Atlantic to the Pacific, from the Great Lakes to the Gulf. "Best plum the earth produces."—T. E. Keith, Texas. "Stands our winters like hardiest natives."—A. N. Seymour, Wisconsin.

AMERICA. A full Brother of Gold, the Sensational \$3,000.00

Plum. From the far-reaching experimental hybridizing by the great scientist, Luther Burbank, came two grand plums—Gold and America; it was then plum growing received its greatest impetus. America is a large, glossy, coral red—one of the most beautiful and delicious plums ever grown. Tree large, very vigorous, thoroughly hardy, bears extremely young, and bears enormous crops every year. Ripens very early and succeeds everywhere. "Almost phenomenally free from rot."—Plums of New York. "Uninjured by 55 degrees below zero."—R. J. Williams, Quebec.

EARLY GOLD (Shiro). A pure, transparent, very early golden yellow plum—a huge honey-drop; sweet and excellent. Tree hardy and satisfactory every way in the orchard. A tree loaded with this golden fruit is a wonderful sight. Another Burbank production that has made good; few plums are more satisfactory.

Omaha.

OMAHA. Originated in Nebraska on the grounds of Theodore Williams, noted plum authority and experimenter, and introduced by us at his request; and in less than twenty years it has become one of America's greatest plums. It is of immense size, rich coral red, very striking and handsome; flesh rich yellow, firm, juicy, highly flavored, of wonderful quality and ripens in mid-season. The tree is one of the hardiest, a strong grower and an every-year bearer. We do not recall one single bad report on Omaha, and they have been planted by hundreds of thousands.

When we introduced Omaha the originator wrote us: "No other plum in existence is so cosmopolitan as Omaha; it has fruited from Alberta (Canada) south to the Gulf; it thrives in Vermont and west to the Pacific." In the final test of the variety—in the orchards of the country—it has borne out every one of the originator's claims.

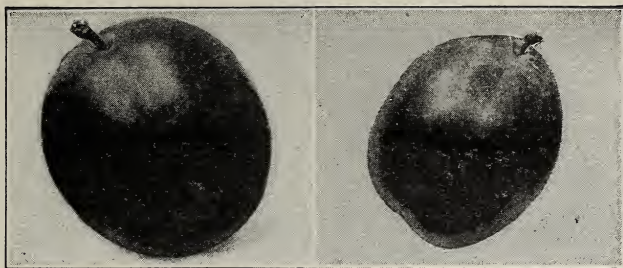

The tree is as sturdy and hardy as an oak, rather spreading in growth, bears tremendous crops every year. It is the good plum for everywhere.

Hardiest Plum That Has Commercial Value—Omaha gave me a fine crop this season. Last winter worst for thirteen years, even Earliest of All froze—Omaha came through smiling 100 per cent alive and Omaha is the hardiest plum that has commercial value.—Echo Fruit Farm, New Hampshire.

TATGE. One of the finest European plums—superior to Lombard in size, color and quality, and has less rot. Fruit light purplish red, large size, good quality—the ideal kitchen plum. Hardy, immensely productive, bears young.

STARK DAMSON (Big Mackey). European. A true Free-stone. The largest and best of all Damsons: originated in Pike Co., Mo., and known locally as Big Mackey. Deep purple, juicy, rich, small stone, fine for preserves. Tree upright, hardy, bears enormous crops, with little or no care, and should be planted in every orchard.

STARK GREEN GAGE (Missouri). "Sweet as honey." Best of all Gage Plums. Greenish yellow, mid-season, much larger than old Green Gage. Tree strong grower, bears wonderful crops. For preserving and canning it has no superior. The home or market orchard is not complete without it. Originated in Stark Nurseries.

Tatge.

Mo. Green Gage.

In addition to the varieties described, we can supply the following at prices quoted at the bottom of this page:

Abundance	Mammoth Gold
Burbank	Poole Pride
Compass	Prune German
Damson, Shropshire	Red June
Duarte (Indian Blood)	Santa Rosa
Freestone Goose	Wild Goose Imp'd.
Late Goose

WHY WE HAVE STARK NURSERIES IN 7 DIFFERENT STATES

Over 100 years' experience proved to us, that there are a few small spots of Wonderful Soil with ideal climate, that grow apple trees better than all the other sections; others grow finer rooted cherry; other places produce the best peach trees. We have 400 acres—once the bed of Lake Erie—where grape vines have more wonderful roots than elsewhere. Three other little Valleys grow wonderful apple seedlings, etc. Similar exceptional combinations of soil and climate grow better plum trees, pear trees, apricots, etc.

We have located a Nursery at Each one of these Ideal Spots—IN SEVEN DIFFERENT STATES IN THE U. S. AND ONE IN FRANCE. That is One Big Reason Why Stark Trees are So Much Better than any other trees. No other concern does this. We not only know how to grow them better, but we also know WHERE to grow them Best. We have discovered the ideal soil and climate to produce the best trees of each type, and they are grown under the Direct Supervision of the Starks themselves—Direct From Our Nurseries to Your Orchards.

A Block of Cherries in Stark Nursery.

RICH, JUICY CHERRIES

EARLY RICHMOND. An old standard sort. Ripe about a week later than Dyehouse. A hardy, profitable early sort, but Dyehouse is better.

DYEHOUSE (Earliest of All). A better cherry than Early Richmond, a week earlier, larger, smaller seed—best very early variety. Grown largely all over the United States. Dyehouse, Montmorency Stark and Suda Hardy is a combination that gives fruit during the entire cherry season.

SUDA HARDY (Late). Wherever a late cherry is wanted, Suda Hardy should always be planted. The tree is perfectly hardy, and the fruit is produced in immense quantities. Of the English Morello type, but larger, not quite so acid, better quality, and the tree produces larger crops.

ROYAL DUKE. Large, light red, rich, juicy, semi-sweet cherry—the best of all the Dukes. Royal Duke should be planted in home orchards everywhere.

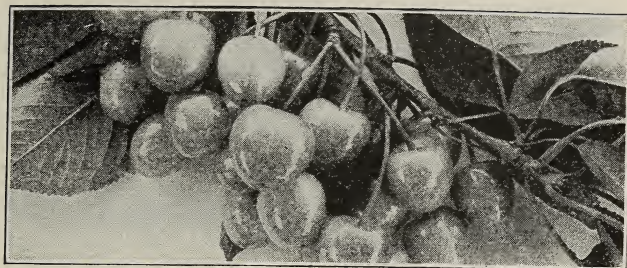

BLACK TARTARIAN IMPROVED (Deacon) Early. A select and greatly improved seedling of old Black Tartarian; a large black, heart-shaped, juicy sweet cherry; widely known and extensively planted. Tree upright, dense grower, vigorous, regular bearer. Wherever a black sweet cherry is wanted plant Black Tartarian Improved. The best, earliest, hardiest and most profitable black sweet sort (25c Extra).

NAPOLEON. A large, yellow, sweet cherry, attractively blushed with pink—beautiful and delicious. Largely grown in all sweet cherry sections. Ships well and is one of the finest for canning. Strong, hardy tree and bears immense crops.

Prices for All Cherries on this Page.

A Branch of Luscious Stark Gold Cherry.

GLORIOUS STARK GOLD (Trade Mark). Discovered, introduced, owned, and sold only by Stark Bro's. At last we can offer a sweet cherry that is **really hardy**. Stark Gold Cherry came from Richardson Co., Neb., and was introduced by Stark Bro's. We quote Mr. Thomas, the originator; "Surpassed in hardiness any cherry on my place; thermometer often registers 40 degrees below zero, and average winter reaches 25 to 30 below. Stark Gold never misses a crop. Sells for three times the price of other cherries." The fruit is of immense size, **glossy, almost transparent, pure, luscious golden color** without a single touch of red, and the quality is **superb**. It ripens about two weeks later than Early Richmond, but will hold on to the tree 10 days after ripening. Cherry growers throughout the whole country are enthusiastic over this wonderful sweet cherry and we have never been able to grow enough to supply the demand.

Trees full of Great Big, Glowing, Golden Cherries. My Stark Gold Cherry blossomed less than fourteen months after being set out. It has borne every year since and this is the third year.—Mrs. J. S. Brown, Connecticut.

Great, Big Yellow Cherries. Our four-year-old Stark Gold Cherry Tree is five inches in diameter and eighteen feet high. Last year it was full of great, big yellow cherries, **solid meat** and splendid flavor.—Roy F. Barnes, Illinois.

Big, Beautiful, Splendid.—"My Stark Gold Cherry brought 50 cents a gallon. Big, beautiful, splendid flavor. Wonderfully **hardy**;—bears regularly and bore when 2 years old. Couldn't do without them; they are splendid—Extra Fine.—Miss Entropins Rahrbaugh, Bedford Co., Pa.

Stark Gold Prices

2 to 3 ft.....	1.50	13.00	120.00	800

A Branch of Montmorency Stark Cherry.

THE MONTMORENCIES

MONTMORENCY STARK. The best strain of Montmorency.

From a select tree on our grounds which uniformly bore very large fruit—larger than any other Montmorency. Tree stronger grower than Montmorency King (Ordinaire). Our favorite for over 20 years. Fruit large, flesh firm, ships perfectly; tree strong grower, sure and young bearer, **largest of all the sour cherries**, very hardy; produces tremendous money making crops—succeeds throughout the U. S. This great cherry should be grown on every farm and on every town lot, along driveways—wherever a space 10 feet square. It is the perfect variety for pies, preserves, cobblers, puddings and other good “eats.” Three-fourths of all cherries should be of this type.

MONTMORENCY KING (Ordinaire). Cannot be too highly recommended for quality and quantity of fruit, hardiness and beauty of tree, and unfailing crops. Ripens a week or ten days after Early Richmond. The Montmorency is the most widely planted of all sour cherries, but there are not one-half enough grown to supply the demand for the fruit.

MONTMORENCY MONARCH. A splendid strain of Montmorency from the Iowa Experiment Station, where it made a wonderful record. Seventy Monarch trees on our grounds produced 1,175 gallons of fruit after the birds and the children had feasted many times.

MONTMORENCY SWEET. A true Montmorency, but sweeter than any other strain. Originated on our grounds, where we watched it for many years before introducing.

Other Varieties.—We can also supply Bing, Gov. Wood, Lambert, Royal Ann, Windsor, and English Morello.

Prices for All Cherries on this Page.

300 at 1000 rate; 30 of a kind at 100 rate; 10 or more of one kind at 10 rate; less than 10 at Each rate.

A Branch of Stella Apricot.

APRICOTS

STELLA. A very productive Apricot; originated in Nebraska.

The hardiest variety, succeeding where peaches will not stand. Unsurpassed for productiveness, size and color. The originator, Theodore Williams, said, "Hardier than most apples, peaches, pears and plums. Every other sort killed, but Stella has gone on bearing full crops."

We also offer **Superb**, a hardy and well known variety from Kansas, and **Wenatchee Moorpark**, a select strain of **Moorpark** from the famous Wenatchee Valley of Washington.

Apricot Prices

QUINCES

VAN DEMAN (Trade Mark). Best and largest quince. "The

Golden Apple of the Hesperides." One of our \$9,000.00 fruits purchased from Luther Burbank. Superb flavor. Two-year tree bore 11 fine quinces. Fine for baking and canning. Tree hardy, healthy. If room for only one quince, plant a Van Deman.

When we introduced Van Deman, Mr. Burbank wrote us: "Often weighs 25 ounces—baked, canned or dried it retains its best quince flavor. No other variety can compare with Van Deman in size, quality, flavor and beauty."

We can also supply trees of **ORANGE** Quince, a well-known old variety that is planted largely in some sections.

Quince Prices

Sturdy Stark Grapes as Far as You Can See

GRAPES

GRAPES FOR EVERYBODY. The grape is the easiest of all fruits to grow. The plants take little room, they thrive despite neglect and every year they produce their wealth of beautiful, health-giving fruit. East, West, North and South, on hill or in valley, on poor soil or rich, the grape grows, thrives, bears; it never disappoints.

THE STARK GRAPE NURSERIES. Following our general plan of growing nursery stock, we called to our assistance some of the best authorities on grape soils in the United States and after extensive testing, experimenting and observing, we selected what we consider the finest grape soil in America, and established there a great grape nursery.

It is located in Erie County, Pa., in the loose, gravelly soil of that section, where we produce the finest rooted grape vines we have ever seen. This plant is in charge of a man who has had a lifetime of grape-growing experience, and we offer to vineyardists vines that are grown by best known methods and from wood taken from absolutely dependable vineyards, making mixes practically impossible.

Our list of varieties is carefully selected, and we offer the best known kinds—those that have proved best in fruiting and on the market.

STARK ECLIPSE (Trade Mark). The earliest of all black grapes—ripens a week to 10 days ahead of Moore Early. Best of all varieties for grape juice. Handsome, compact bunch, hangs tenaciously to the vine. Vine healthy, hardy, vigorous grower. It originated on the grounds of Mr. E. A. Riehl, Illinois Experiment Station, Alton, Illinois, a nationally known authority on grapes. We introduced the variety after exhaustive tests and it HAS NEVER DISAPPOINTED us. After fruiting the variety for years, Mr. Geo. W. Endicott, famous Illinois authority, wrote us: "Eclipse is the BEST EARLY GRAPE THAT HAS BEEN PRODUCED IN THIS COUNTRY so far as I have been able to learn from 50 years' experience."

See Page 32 for Grape Prices.

Lutie.

Diamond.

Worden.

MOORE EARLY. A black grape similar to Concord in appearance and quality, but ripens two weeks earlier and is the leading standard black grape of its season. Bunch and berry large, quality good. Vine healthy, vigorous, hardy, **HEAVY BEARER.**

CAMPBELL EARLY. A black early grape of great size that ripens about two weeks ahead of Concord, but the ripening season is variable, ripening through a long season, and is generally marketable slightly earlier than Worden. Keeps and ships well. Vine vigorous, productive, hardy with thick mildew-resisting foliage.

DIAMOND (Moore's Diamond). We recommend Diamond as the best quality hardy white grape. Berry and bunch large. Vine hardy and as dependable as Concord. In our experience more dependable than Niagara.

WORDEN. Splendid black grape. Hardy, healthy, productive like Concord. Larger, better quality, 10 days earlier. Large bunch and berry, excellent quality. Mr. Fullerton, L. I., N. Y., Experiment Station, writes: "Worden positively paralyzed us with its yields."

CONCORD. The most widely grown, most popular of all grapes, and is making money for vineyardists everywhere. Healthy, hardy, vigorous vine, large bunch and berry and produces immense crops.

LUTIE. A rich red grape that is good everywhere and under all conditions. Vine vigorous, heavy bearer; fruit delicious in quality, seldom rots, and ripens in mid-season. We recommend this wonderful red grape.

NIAGARA. Best known white grape. Ranks with old reliable Concord in vigor and productiveness. Widely planted. Bunch large; handsome, juicy and a fine flavor. Recommended for planting in every section.

See Page 32 for Grape Prices.

BRIGHTON. Bright red, heavily shouldered; large bunch; one of the sweetest and most delicious. Known everywhere. Ripens before Worden. It adapts itself to most any soil, and is always productive.

KING. A black grape that is much larger than Concord, more vigorous and better in quality—not subject to rot. Steadily gaining in favor. A strong growing hardy vine; should be planted with other sorts for pollenization. Diamond, Worden and Lutie are ideal for this purpose.

OTHER VARIETIES. In addition to above described kinds we offer many other well known kinds, and they are priced in the price schedule below. Agawam, Banner, Carman, Catawba, Cynthiana, Clinton, Delaware, Green Mountain, Herbert, Hicks, Ives, King Philip, Lindley, Lucile, Woodruff.

GRAPE PRICES

IMPORTANT—A bunch of 25 of one variety of Raspberry, Blackberry, Dewberry, Roses, Shrubs, Climbers, Hedge Plants, Garden Roots, may be sold at 100 rate; 300 at 1000 rate. Buy a bunch of 25—it is cheaper. Where no 1000 rate is quoted the 100 rate governs

Flaming Giant Raspberry.

RASPBERRIES

CUMBERLAND. This splendid berry is by far the most successful and most profitable black raspberry. Extremely hardy, vigorous grower, extraordinarily productive, disease resistant. Fruit large, firm, excellent quality, ships well.

FLAMING GIANT. It was from Prof. N. E. Hansen, M. S., Vice Director, S. D. Exp. Sta., that the first Flaming Giant (Ohta) Red Raspberry came to us. Now, after years of severe tests we believe it to be the greatest red Raspberry. On our grounds and elsewhere bears twice as much as other red kinds. Extremely large, rich, red, fine shipper. Should be in every garden.

BLACKBERRIES

EARLY HARVEST. The old standby. Firm, good quality, most productive. Ripens early.

MERSEREAU. One of the hardiest. Berries large, excellent quality, ship well. One of the best.

LUCRETIA DEWBERRY. Large, jet black, best quality. The best dewberry.

ASPARAGUS—RHUBARB—HORSERADISH

F. O. B. Nurseries	Each	100	1000
Asparagus, Bonvalette Giant.....	\$0.10	\$ 5.00	\$25.00
Asparagus, Conover's Col.....	.10	5.50	25.00
Asparagus, Palmetto.....	.10	6.00	30.00
Asparagus, Mam. White.....	.10	6.00	30.00
Asparagus, Reading Giant.....	.15	8.00	40.00
Rhubarb, Myatt's Linnaeus.....	.25	12.00	80.00
Rhubarb, Victoria Giant.....	.30	18.00	90.00
Horseradish.....	.20	10.00	70.00

CLIMBING VINES

F. O. B. Nurseries			
	Each	10	
Bitter Sweet (<i>Celastrus scandens</i>).....	\$0.60	\$5.50	
Clematis, Japanese.....	.55	5.00	
(<i>Clematis paniculata</i>)			
<i>Clematis paniculata</i>55	5.00	
(Japanese Clematis)			
<i>Clematis "Jackmanni"</i> (Purple Clematis).....	1.25	11.00	
<i>Clematis "Madam Andre"</i> (Red Clematis).....	1.25	11.00	
<i>Clematis "Henryii"</i> (White Clematis).....	1.25	11.00	
Honeysuckle, Hall's Japan.....	.50	4.50	
(<i>Lonicera Halleana</i>)			
Honeysuckle, Trumpet (<i>Lonicera sempervirens</i>)....	.60	5.50	
Ivy, American.....	.50	4.50	
(<i>Ampelopsis quinquefolia</i>)			
Ivy, Boston (<i>Ampelopsis Veitchii</i>).....	.70	6.50	
Ivy, Engleman's (<i>Ampelopsis quinquefolia</i> Engle- manni).....	.55	5.00	
<i>Lonicera Halleana</i>50	4.50	
(Hall's Japan Honeysuckle)			
<i>Lonicera sempervirens</i> (Trumpet honeysuckle)....	.60	5.50	
Matrimony vine (<i>Lycium chinense</i>).....	.50	4.50	
Trumpet vine (<i>Bignonia radicans</i>).....	.50	4.50	
Wisteria, White (<i>Wisteria sinensis alba</i>).....	.85	8.00	
<i>Wisteria sinensis</i> (Chinese Wisteria).....	.75	7.00	

PAEONIES

F. O. B. Nurseries			
	Each	10	100
Assorted Varieties.....	\$0.50	\$4.50	\$35.00
Festiva Maxima (Giant White).....	.70	6.50	50.00
Edulis Superba (Pink).....	.70	6.50	50.00
Officinalis Rubra (Red).....	1.25	11.00	75.00
Queen Victoria (White).....	.60	5.50	45.00
Felix Crousse (Red).....	1.25	11.00	75.00

HARDY CLIMBING ROSES

F. O. B. Nurseries			
	Each	10	
American Pillar (<i>Pink</i>).....	\$1.00	\$9.00	
Baltimore Belle (<i>White</i>).....	.60	5.50	
Crimson Rambler (<i>Red</i>).....	.75	7.00	
Climbing Baby Rambler (<i>Red</i>).....	1.10	10.00	
Climbing American Beauty (<i>Red</i>).....	1.00	9.00	
Christine Wright (<i>Pink</i>).....	.85	8.00	

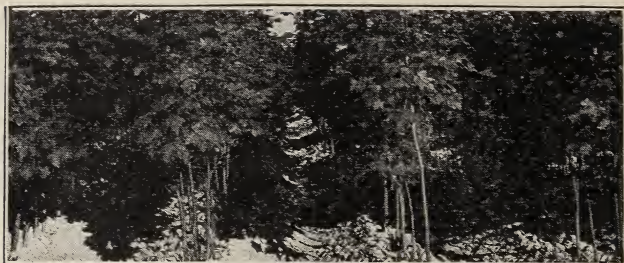

HARDY CLIMBING ROSES—Continued

F. O. B. Nurseries		
	Each	10
Dorothy Perkins (Pink)	\$0.60	\$5.50
Dr. W. Van Fleet (Flesh)90	8.50
Everblooming Crimson Rambler (Red)	1.00	9.00
Excelsa (Dark Red)75	7.00
Hiawatha (Red)75	7.00
Lady Gay (Light Pink)75	7.00
Paul's Scarlet Climber	1.00	9.00
Queen of Prairies60	5.50
Silver Moon (White)	1.00	9.00
Thousand Beauties (Pink)90	8.50
Trier (Creamy White)75	7.00
White Dorothy Perkins (White)75	7.00

HARDY GARDEN ROSES—BUSH FORM

Classes are indicated thus: H. T.—Hybrid Tea; H. P.—Hybrid Perpetual; T.—Tea; Pol.—Polyantha; H. R.—Hybrid Rugosa.

F. O. B. Nurseries		
	Each	10
Anna de Diesbach (H. P.) Pink	\$0.80	\$7.50
Baby Rambler (Pol.) Red80	7.50
Burbank (China) Light Pink85	8.00
Catherine Zeimet (Pol.) White85	8.00
Clio (H. P.) Flesh85	7.50
Clothilde Soupert (Pol.) Flesh85	8.00

Special Low Price Demonstration Offers

Starking (Trade-Mark)

Stark Delicious (Trade-Mark)

Stark's Golden Delicious (Trade-Mark)

To encourage one orchardist in every neighborhood to plant Starking, Stark's Golden Delicious, and Stark Delicious—the best apples and the biggest money makers they can plant, we will supply not less than 250 trees of either at the following SPECIAL DEMONSTRATION PRICES:

STARK DELICIOUS

4 to 7 ft. at	48c each
3 to 5 ft. at	36c each
2 to 3 ft. at	28c each

STARK'S GOLDEN DELICIOUS

4 to 7 ft. at	65c each
3 to 5 ft. at	55c each
2 to 3 ft. at	50c each

STARKING

4 to 7 ft. at	85c each
3 to 5 ft. at	75c each
2 to 3 ft. at	70c each

When ordering Starking or Stark's Golden Delicious, do not fail to sign agreement which will be found at the bottom of our regular Order Blank, a copy of which is enclosed with this book.

You surely should grasp this money-saving, money-making opportunity AT ONCE.

We cannot continue this offer all season, in all probability. We have set aside certain blocks of these varieties for these Demonstration Offers. When these reserve blocks begin to show signs of running low, WE WILL CANCEL THIS OFFER.

So, it's absolutely a case of "First Come—First Served." We will reserve the trees for the Demonstration Orchard customers in the order that they are received—and those who order Demonstration Orchards too late, will have only themselves to blame.

Customers to be first class, reliable and agree to take good care of trees.

These demonstration orchards must be clearly marked on the order "Demonstration Orchard" so we will understand the reduction in price.

Low Price Collections

The following collections contain the best varieties known and are arranged to save customers' time, and to give them the advantage of the help of Expert Orchard men in selection of varieties if they intend to plant a home orchard.

These experts have prepared collections that will please every customer—ranging in price from \$5.00 to \$35.00. Each collection is numbered, so in ordering be sure that this number is given. This will facilitate handling here.

Remember, please, we cannot make any change whatever in varieties, and we reserve the right to use another similar variety if any sort named sells out before your order is received.

Here is a chance to save some money—figure the prices yourself.

The trees used in these collections are the heavy 4 to 7 ft. size—the size sure to please. Get your order in early.

12 Big Apple Trees for the Price of 10

ALL-AMERICA PRIZE APPLE SELECTIONS

No Changes of Varieties in Selections Allowed

\$10.00 for Both Golden and Red Apple Selections (12 trees), size 4 to 7 ft.

1 J. H. Hale

1 Elberta Cling
1 Elberta (Queen)
1 Krummel October

Here are the 6 most desirable white peaches and the 6 most desirable yellow peaches. If you order the 12 trees, we will make a special price of \$7.00—a saving to you of \$2.20.

TERMS.—All cash with order, except on orders of 300 trees or more where parties are known to be reliable—one-fourth cash, balance upon arrival.

NON-WARRANTY.—In the event that any nursery stock or seeds sold by us should prove untrue to name under which it is sold, we hereby agree on proper proof of such untruthfulness to name to replace that portion of the order proven untrue to name, or to refund the purchase price thereof. Except for such liability, and in respect to all nursery stock or seed sold by us, we give no warranty, express or implied, as to description, quality, growth, productiveness or any other matter.—Stark Bro's Nurseries & Orchards Co.

We do not replace stock that fails to live. Possible neglect, unavoidable climatic conditions, etc., prevent us guaranteeing trees or seeds to grow. We deliver to transportation company in good condition and our responsibility ends there. If stock is damaged in transit, claim for damage should be made promptly on transportation company.

CHANGES IN ORDERS.—It may be necessary to make some changes in size and variety of trees and plants ordered—unless customer states definitely that it will not be permitted. Changes, if made, will be under the supervision of expert trained men and equal or superior sorts will be sent and labelled correctly.

Stark "ROUND-the-WORLD PACK" Brings You "FULL-of-LIFE" Trees

Did you know that probably half the trees planted by orchardists are only "half alive"? Many of these "half alive" trees grow and finally make fairly good trees, but they would make good trees 2 or 3 years sooner if the **Delicate Roots Retained all the Vigor** they had when lifted from the ground, "**Full of Life.**" Stark Bro's great care in **Preventing Exposure Through Every Step** of the Digging and Shipping, and finally the Stark wonder packing—the "**Round the World Pack**"—Brings Your Stark Trees to you "**Full of Life,**" so they will give you 2 or 3 extra crops, will come into bearing younger, and will make bigger trees quicker and live longer than other trees, that to the eye look almost as good. But yet when they are planted, what a wonderful difference! In two years your Stark Trees are tremendous big trees—the other trees just poke along and never catch up.

\$5,583.00 From Less Than 2 Acres of Stark's Golden Delicious Trees

Above photograph shows one of 130 Golden Delicious trees which yielded 1,220 Boxes, and sold for \$4.57 per box. The article below was clipped from the DAILY WORLD, Oct. 22.

"What is believed to be the most valuable apple crop ever harvested from any equal number of trees has just been shipped from the Entiat orchard of the American Fruit Growers. From 130 trees occupying a space less than two acres, 1,220 boxes were taken which yielded \$5,583.00 f. o. b."

Earl Barnhill, regional supervisor, said: "The Golden Delicious is the heaviest bearer of all commercial varieties. I believe it stands alongside the red Stark Delicious, these being the two premier apples of the fruit world."
